BUILDING PRODUCTS

ASSURANCE, TESTING, INSPECTION AND CERTIFICATION
FOR THE BUILT ENVIRONMENT

As the building products industry leader in testing, inspection, and certification, Intertek has the expertise, local and global footprint, and the breadth of capabilities to provide our customers the one solution they need to access their desired domestic and international markets.

Helping to guide clients through the complexities of testing and certification for a given environment or jurisdiction, our global footprint and network of experts provide our clients with a faster, more cost effective, and customer-oriented solution.

Whether you require fire, performance, safety, or environmental testing, Intertek has the necessary expertise and a complete suite of services to get your products to market quickly, allowing you to save time and maximize your revenues.

With a global network of over 40 Building Products labs and offices spanning from North America, to the Middle East, to China, Intertek can test and certify your products to meet almost any domestic or international codes and standards, including ANSI/UL, ASTM, CSA, EPA, ICBO and ULC. We hold accreditations from the world's leading code bodies, including OSHA, the Standards Council of Canada (SCC), IAS, NFPA, Miami-Dade County, A2LA, APLAC, ILAC, and more.

Certification

To support our customers' commitment to comply with relevant codes, standards and industry association requirements, we offer comprehensive, cost-effective certification solutions including Intertek's globally recognized ETL and Warnock Hersey Marks.

Engineering

Through a single point of contact, our engineers will provide you guidance through the often confusing regulatory world of testing and certification - giving you faster and more cost-effective market access. With a staff of materials, mechanical, structural, chemical, and electrical engineers, we customize plans to get your product through the testing process quickly and into your desired domestic or global market.

Environmental

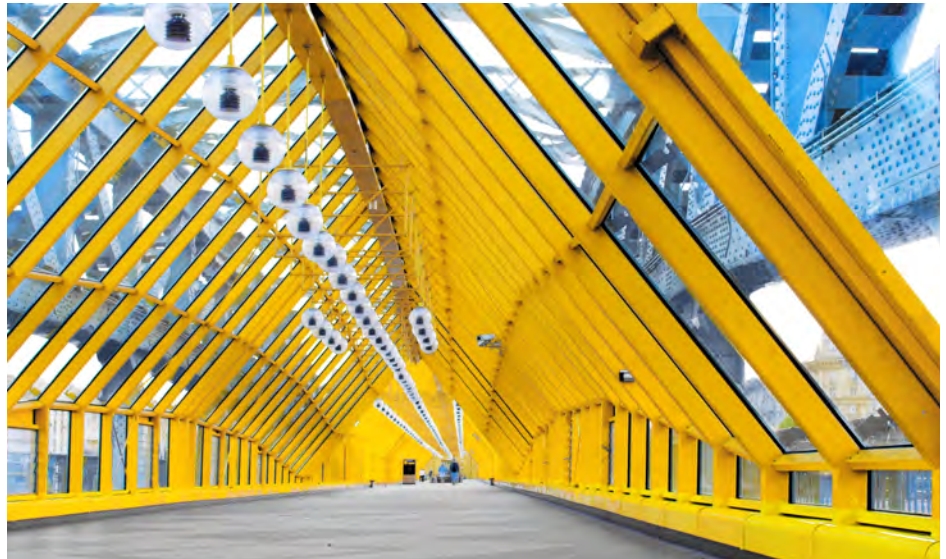

With a wide variety of comprehensive environmental certification services, we can verify your product's compliance with domestic or international environmental standards and codes. Using the ETL Environmental Mark or a Code Compliance Research Report (CCRR) by Intertek, you have independent third party verification regarding specific, sustainable claims and declarations made on your product.

Personnel Qualification

Beyond product certification, Intertek's Qualified Personnel (IQP) Program offers personnel certification designed to enhance your business offerings and provide added value to your customers. Becoming a qualified installer or inspector provides significant advantages over your competition and opens the doors to new business opportunities.

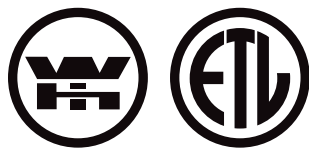

Our testing services include

- Acoustical
- Marine
- Air / Water / Structural
- Miami-Dade County
- Blast, Ballistics, Assault Resistance
- Mock-Up
- Chemical
- Performance
- Durability
- Polymer Building Material Analysis
- Environmental
- Research & Development
- Field
- Retail
- Fire Resistance
- Thermal
- Flammability
- Research & Development Services
- Jet Fire
- Weathering Testing

Our certification marks

The Warnock Hersey Mark has long been one of the building product industry's most recognizable certification marks and can be found on a variety of products including hearth, plumbing, fire doors, and windows.

Intertek

The ETL Mark is one of North America's most accepted and fastest growing certification marks. Utilized as a mark of conformance for both electrical and fire products, the ETL Mark is readily recognizable by authorities having jurisdiction across the US and Canada.

Intertek

Building better together

Over the last few years we have grown significantly through the acquisition of leading industry organizations. Starting in 2005, we purchased Texas-based Omega Point Laboratories (OPL) expanding our fire testing capabilities. In 2013, Architectural Testing, Inc. (ATI) joined the family expanding our reach into the building sciences market and adding to our fenestration, thermal, and acoustic capabilities. Most recently, both the Materials Testing (MT) Group and Professional Service Industries, Inc. (PSI) became a part of Intertek in 2015. The additions of these two organizations has allowed Intertek to expand our services further downstream taking our services out of the lab onto the construction site.

As we have grown, we have been able to leverage the most desirable qualities of each organization while increasing our service offerings and creating a better customer experience. With each expansion of the Intertek family, our partners have been able to benefit from the synergies inherent with expanded capabilities, gain further access to global and domestic markets, and access a more comprehensive suite of services throughout the building and construction project life cycle.

Built on legacy

Intertek's Building & Construction division stands on the shoulders of giants. Our history of innovation, growth, and expanded services comes from a legacy of leading industry organizations whose spirit and culture continue to drive our desire to serve our clients ever better.
